

GIVAS CP1030 – ENDOSCOPY TROLLEY

Endoscopy Trolley

The trolley is composed of five drawers, equipped with inner adjustable partitions. On one side there are two containers for probes, made of stainless steel, and on the other side there is a sharps needles bin for special wastes and a waste bin with knee opening.

Features

- The cart is made of polypropylene.
- Impact resistant and washable up to 100°C, with rounded edges and ergonomic shapes.
- The back is made of satin-finish stainless steel sheet.
- Drawers are made of polypropylene with recessed handles and free of sharp edges and are mounted on telescopic guides.
- Twin wheels (2 with brake and 2 free option antistatic)
- All of the cart surfaces are rounded and devoid of interstices for cleaning purposes.
