(1-100 PATIENTS PER DAY)**

Max. patient weight: 23 stone (150kg)

Patients should avoid using the chair
arms for support when leaving the chair

ZAP11601 – RECLINING PHLEBOTOMY CHAIR

Features

- The seat, the leg rest and the backrest are moulded out of cold-foamed integral polyurethane (fireproof) and this allows the maximum comfort for patient in order to prevent decubitus ulcers.
- Backrest is equipped with push handle.
- Synchronized bilateral control for backrest and leg rest through gas-spring.
- Armrests are padded and upholstered, shaped for a better position of the arms and adjustable in all positions
- Four steel feet with end part made of non-slip plastic
- All materials are treated with anti-bacterial additive INTERPON.
- ANTI-SHOCK or TRENDLENBERG position:
 - Backrest from -5° to +100°
 - Leg-rest from -90° to +14°

Reclining Phlebotomy Chair

The armchair is entirely made of tubular steel varnished with epoxy powders which allow high mechanical, chemical and corrosion resistance. The backrest has a steel structure, while the leg rest and seat are made of solid anti-humidity multilayer beech-wood panels, consisting of several sheets and wood fibres.
