Developed specifically for orthopaedic bracing, Ortholine™ is a superior material which gives optimum patient comfort without compromising fit and compression. It has a unique tri-laminate construction with an outer surface of hard wearing jersey nylon bonded to a breathable stretch foam which is lined with soft absorbent stretch towelling. Lightweight, durable and comfortable Ortholine™ is clinically effective and excellent in the treatment of patients suffering from Rheumatoid and Osteoarthritis.

PodoGel Range

PodoGel is a therapeutic range of pure silicone gel containing mineral oil. The products are washable and reusable, manufactured to a high standard to give effective therapy, together with continuous lubrication of the tissue. Each product is extremely soft and elastic and is comfortable to wear. All products are designed to be worn against the skin and fit easily underneath the shoe.

Silicone Gel Hallux Valgus Protector
